TRADOC List QM Enlisted Personnel Development lee.tradoc.list.qm-enlisted-personnel-development@army.mil.

TRAINING:

1. Phase 1: 2 Weeks Resident Training Course
2. Phase 2: 2 Weeks Resident Training Course

SUMMARY OF DUTIES:

The Water Treatment Specialist is primarily responsible for supervising and installing water purification equipment, ensuring clean water storage and availability, and performing water quality tests to detect potential contaminants. They also inspect facilities and food suppliers for disease-causing agents, germs, and environmental hazards. In Field Hospitals, they serve as laundry equipment operators, overseeing the sanitary operation of laundry facilities to maintain health and hygiene standards, safeguarding public health and preventing the spread of waterborne diseases.

1. Purify water using various treatment methods, ensuring potable water standards. Operate and perform preventative maintenance on a wider range of water treatment equipment. Analyze water samples, interpret results and adjust treatment processes. Supervise small teams in water purification tasks, providing guidance and training. Inspect facilities and food suppliers for basic sanitation concerns. Maintain inventory of chemicals and supplies, managing stock levels. Operate laundry equipment facilities, ensuring sanitary operation.
